O. ONGUNY, Philip, Professor

Dr. Onguny received his Ph.D. in Communication from Université de Montréal in 2013, where he concentrated in International Communication and Development. He has an M.A. in Organizational Communication from Keene State College and Université de Rennes 2, and a B.A. in Information and Communication Sciences from Université de Rennes 2. Before joining Saint Paul University, Dr. Onguny served as an Instructor in the Department of Communication at Université de Montréal for over four years. Dr. Onguny's work focuses on three research streams: a) the role of media in conflict transformation and humanitarian intervention; b) implications of global communication on public opinion and democratization processes; and c) social activism in the contexts of new media and digital technologies. In the first line of his research, he draws on theories of international communication, including perspectives from political science and international relations, to investigate how the media's coverage of conflicts influence the actions taken by governments, civil society, and NGOs involved in peace-building efforts. In the second stream, he embraces issue-framing and audience research to examine how global information flow impacts public opinion on various issues, including cultural alignments and dominant social order. In the third cluster, he adopts critical theories of media to assess ways in which digital technologies and social media platforms create new opportunities and challenges for conventional democratic ideals such as freedom of speech, power legitimacy, and social justice. As part of his research and teaching agenda, Dr. Onguny is actively involved in outreach activities as a volunteer at Development and Peace, a Catholic humanitarian organization mobilizing Canadians towards actions for social change, particularly on poverty alleviation and social development in the Global South.
